 - **"Author"** searches against any author or editor
 - **"Keywords"** searches against the entire list of Keywords
 - **"Abstract"** searches against the entire set of abstracts
 - can be modified with AND, NOT, OR, and "" for exact phrases
- Filter search options where you select one or more specific filters
 - **Publication date**
 - Combines multiple selections (AND) so results will include all of your filters
- Provides results with expanded filter set for further refining

Search Results

- include any combination of full books, recent book chapters, and journal articles
- have an expanded set of filters to further refine
 - **Content Type** filters by book, journal, or working papers, depending on your results
 - **Keyword**
 - **Author**
 - **Publication Date**
- provide **Save Search** option, as well as easy access to **"Search History"** and **"Saved Searches"** (see bottom right of Results screen)

Getting Good Search Results

- **For specific or well-known concept(s)**
 - Search for your terms in "Abstract" OR "Keywords" because these are most closely tied to concepts in each publication
 - If you do not get results, search for the same concept "Anywhere" which will capture full text instances of that same term, and you

ABSTRACT

At the 2007 Physics Education Research Conference, a workshop on publishing and refereeing was held with a panel of editors from four different publishing venues: the physics education research section of the American Journal of Physics, the Journal of the Learning Sciences, Physical Review Special Topics–Physics Education Research, and the Physics Education Research Conference Proceedings. These editors answered questions from participants regarding publishing in their respective venues, as well as writing referee reports that would be useful to both journal editors and authors. This paper summarizes the discussion.

Creare cont personal
