

Ghid de utilizare

Bun venit la ebrary®!

1. **Caută** într-un mod simplu sau avansat, după cuvânt cheie, editură, autor, etc. Vizualizează rezultatele afișate în funcție de titlu sau relevanța capitolelor.

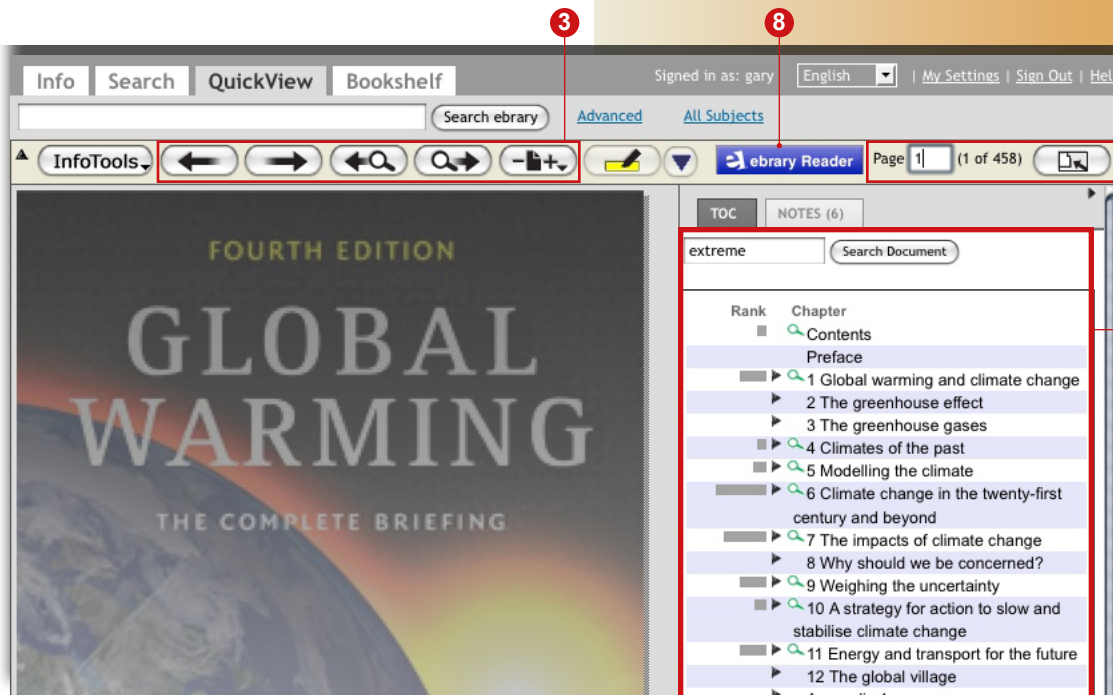

2. **Deschide cartea** printr-un simplu click pe copertă sau titlu. Nu este nevoie de instalare sau descarcare.

3. **Explorează cartea** mergând direct la termenul căutat, sărind la capitolele esențiale sau pur și simplu răsfoind paginile.

The screenshot shows the search results for 'global warming'. The search bar contains 'global warming' and the 'Search ebrary' button is highlighted with a red circle 1. Below the search bar, there are filters for 'BOOK RANK', 'CHAPTER RANK', and 'RECENT'. The search criteria are set to 'Title' for 'global warming' and 'Subject' for 'Climatic Changes'. A section titled 'Focus your search using:' offers options like 'Any of the selected subjects' and 'All of the selected subjects', with various subject categories listed below. The search results show 1-4 of 4 documents. The first result is 'Global Warming : The Complete Briefing' by Houghton, John, published by Cambridge University Press in 2009. The book cover is shown with a red circle 2. The 'ebrary Reader' button is highlighted with a red circle 8. A table of contents is displayed below the book details, with a red circle 2 pointing to it.

Rank	Chapter
	Contents
	Preface
1	Global warming and climate change
2	The greenhouse effect
3	The greenhouse gases
4	Climates of the past
5	Modelling the climate
6	Climate change in the twenty-first century and beyond
	Emission scenarios

The screenshot shows the ebrary Reader interface. The top navigation bar includes 'Info', 'Search', 'QuickView', and 'Bookshelf'. The search bar contains 'global warming' and the 'Search ebrary' button is highlighted with a red circle 3. The 'InfoTools' menu is open, showing navigation icons. The book cover for 'GLOBAL WARMING: THE COMPLETE BRIEFING' is displayed on the left. The 'ebrary Reader' button is highlighted with a red circle 8. The page number is 1 of 458. A table of contents is displayed on the right, with a red circle 3 pointing to it.

Rank	Chapter
	Contents
	Preface
1	Global warming and climate change
2	The greenhouse effect
3	The greenhouse gases
4	Climates of the past
5	Modelling the climate
6	Climate change in the twenty-first century and beyond
7	The impacts of climate change
8	Why should we be concerned?
9	Weighing the uncertainty
10	A strategy for action to slow and stabilise climate change
11	Energy and transport for the future
12	The global village

4. **Subliniază, notează și atribuie-i textului o adresă către alte resurse online.** Subliniază cu mai multe culori chiar dacă sunt sau nu note atașate. Crează-ți spațiu personal (bookshelf) pentru a-ți salva și organiza documentele cu care interacționezi.

5. **Folosește InfoTools** pentru a fi redirecționat către alte resurse online. Trebuie doar să selectezi un cuvânt de interes.

6. **Citează și printează** direct cu referință și adresă către sursă.

7. **Organizează și partajează** lucrările cu care interacționezi. Poți partaja direct prin e-mail informații despre cartea pe care o studiezi sau poți partaja adresa URL către aceasta.

8. Dacă instituția permite acces la instrumentul Unity Reader, ce oferă un plus de funcționalitate, accesezi aplicația printr-un click pe butonul **ebRARY Reader**

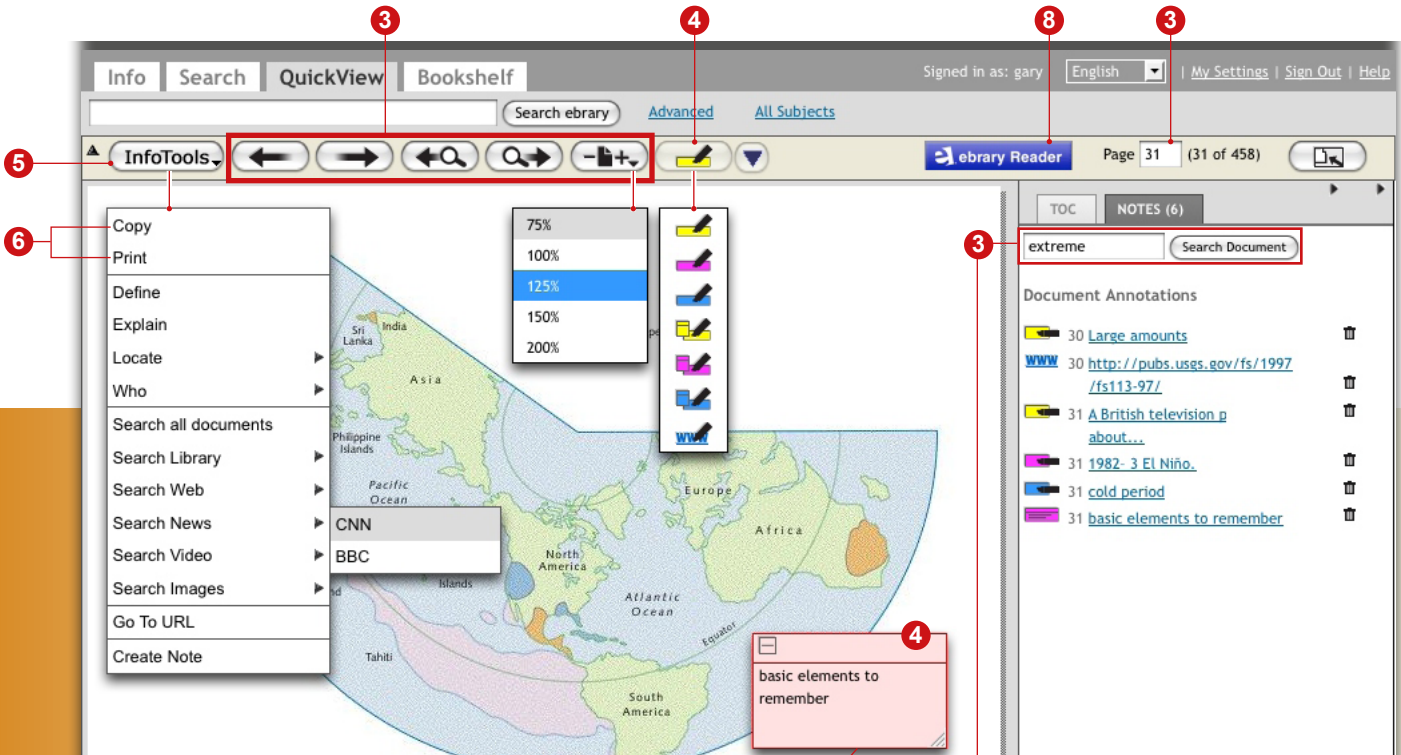

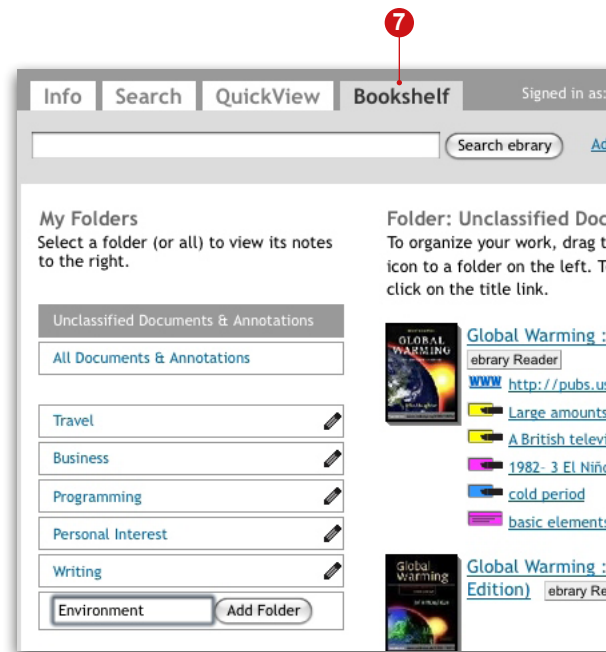

Figure 1.4 Regions where droughts and floods occurred associated with the 1982-3 El Niño.

But the question must be asked: how remarkable are these **extreme** events that I have been listing? Do they point to a changing climate due to human activities? Here a note of caution must be sounded. The range of normal natural climate variation is large. **Climate extremes** are nothing new. Climate records are continually being broken. In fact, a month without a broken record somewhere would itself be something of a record!

Many of us may remember the generally **cold period** over large areas of the world during the 1960s and early 1970s that caused speculation that the world was heading for an ice age. **A British television programme about climate change called 'The ice age cometh'** was prepared in the early 1970s and widely screened - but the cold trend soon came to an end. We must not be misled by our relatively short memories.

One of the largest volcanic eruptions in the twentieth century was **Mount Pinatubo** in the Philippines on 12 June 1991 which ejected 100,000 tonnes of sulphur dioxide into the stratosphere together with 100,000 tonnes of dust. This stratospheric dust caused spectacular sunsets around the world for
